Temptrol® Shower Valve

The Highest Quality Shower Valve in the Industry, Now Faster and Easier to Install

Benefits of the Temptrol® Shower Valve

NEW

Inlets and Outlets are on One Common Plane

Valve body size has been reduced and fits in a 2x3 or modular wall.

NEW

Works with PEX and CPVC

Factory-installed PEX crimp, PEX cold expansion, and CPVC connections are available, reducing installation time onsite.

PEX Crimp

PEX Cold Expansion

CPVC

NEW

Available Rapid Install Bracket

Made of heat-resistant nylon, creates a stable installation, particularly when using non-rigid supply lines, and eliminates the need to measure rough-in, reducing installation time by up to 67% (see “Rapid Install” on back page for more details).

NEW

Stringer Mounts Built into Casting

Allows for easier installation of the valve and can be used to mount the valve to available rapid install bracket for faster and easier installation.

The Symmons Difference

Dezincification Proof

What is Dezincification?

- Dezincification is a form of corrosion and weakening of brass when its zinc content is dissolved out of the brass alloy.
- Dezincification in plumbing fixtures causes cracking, porosity, and weakness that leads to leaks and even breakage.
- A zinc content of more than 15% in your plumbing fixtures increases the risk of dezincification.

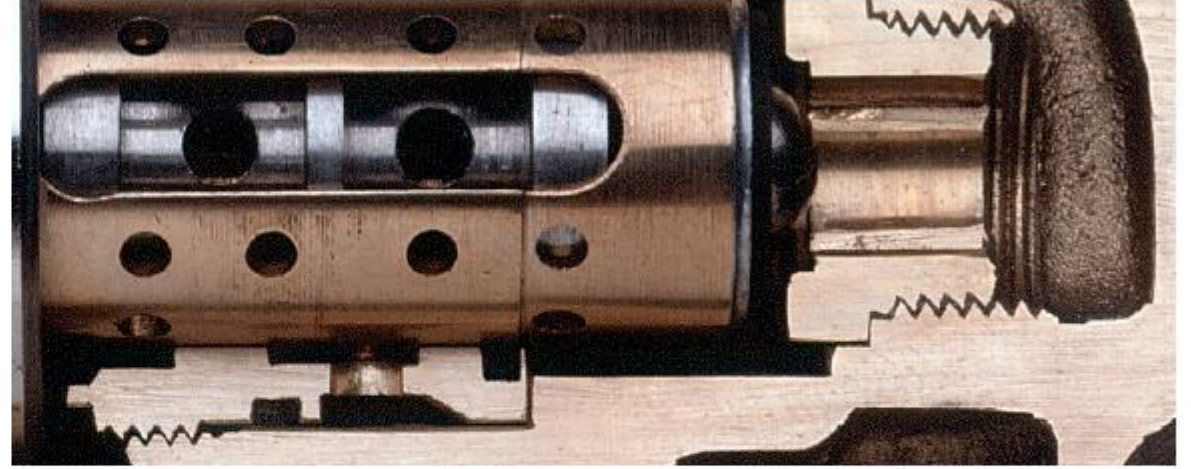

Shower Valve Body Castings and Related Shower Parts

Competitors

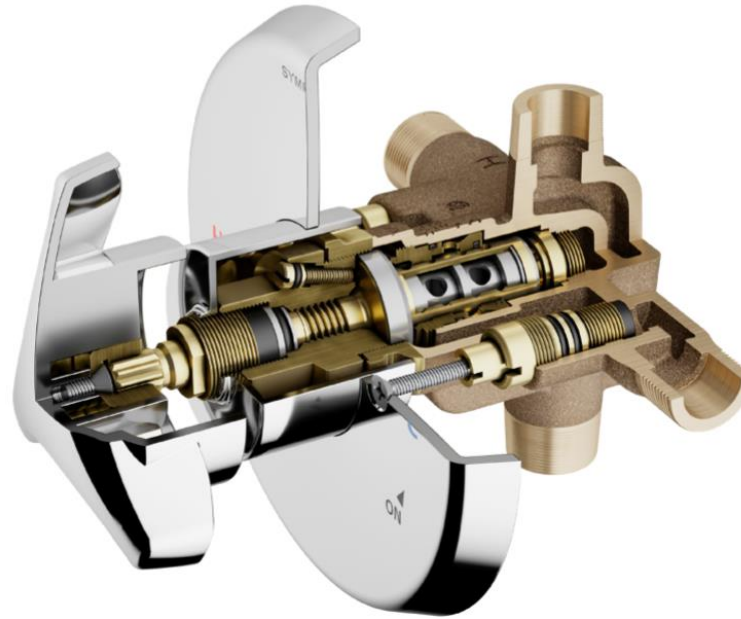

- Some use yellow brass, which contains up to 24% zinc—well over the 15% recommended zinc content, which makes it more likely to dezincify.
- Yellow brass may have other additives to make the brass more dezincification resistant but not truly dezincification proof.

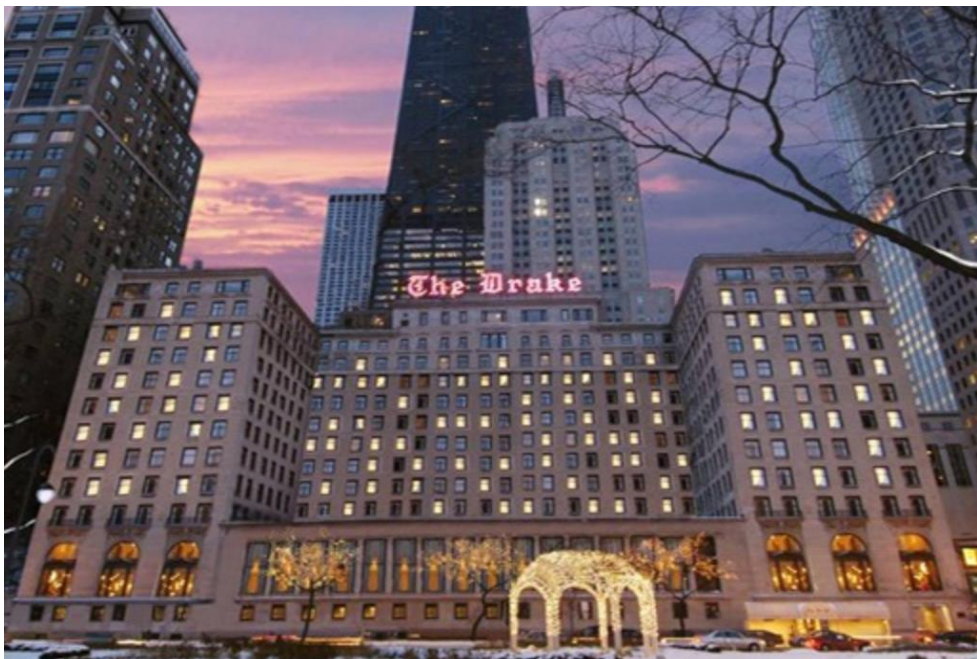

Symmons

- Symmons castings use a semi-red brass, which is made up of about 81% copper and only 9% zinc.
- A zinc content of less than 15% makes a brass dezincification-proof.

SYMMONS
DESIGN
STUDIO™

From Ideation to Creation

Our Process

Collaboration is the hallmark of everything we do. Our Design Consultants help guide your project through our 4-step process:

IDEATION

It all starts with an idea and a meeting with our Design Consultants. Think, sketch, rough it out, and get those creative gears turning.

VISION

Our Designers provide photo realistic renderings, Architectural & Design (A&D) specifications, and 3D plastic models to help visualize the ideal solution. Delivered to you at no charge.

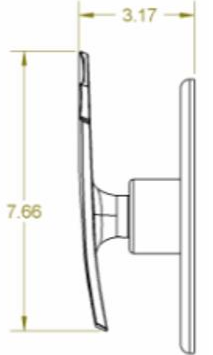

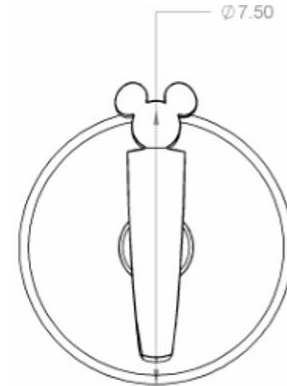

CREATION

With a final design commitment, our Operations team creates your equity-building, unique products on time and on budget. Built to last, designed to stand out, and backed by a customer-first culture.

DEFINITION

Our Engineers take that vision and build in the product definition to finalize manufacturability. Metal mock-up samples are delivered to you at no charge.
