

# Symmons Evolution™

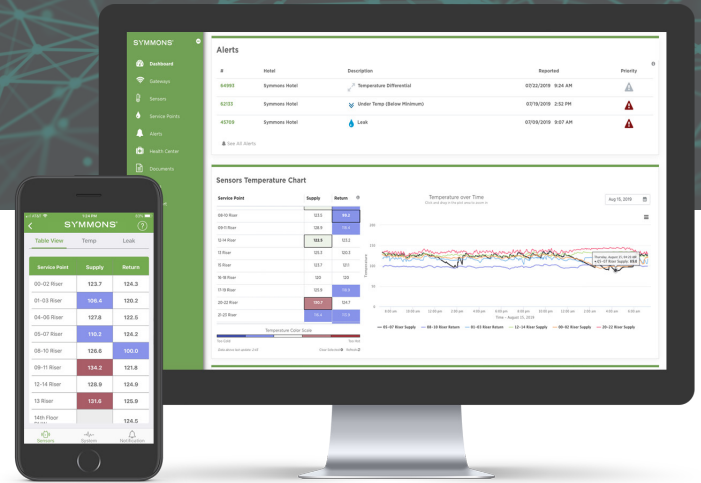

## ESSENTIAL PACKAGE

### Overview

Monitor your property's water systems, and give your staff instant alerts when water issues occur. Your team will find water issues faster and more cost-effectively.

#### With the Essential package you will:

- ✓ Gain peace of mind knowing your guests and property are safe from water related events
- ✓ Reduce your operational costs from inefficient water management and wasted diagnoses time
- ✓ Increase the visibility into your plumbing system
- ✓ Deliver a more positive guest experience

*The fact that I don't have to worry about hot water going to the guest rooms is a comfort. The satisfaction and peace-of-mind the Symmons system give us as managers is incredible.*

**Bob Sighinolfi**

General Manager, Hampton Inn & Suites

### ESSENTIAL PACKAGE INCLUDES

#### Temperature Monitoring

Real-time temperature readings for all of your water system service points.

#### Leak Detection

Leak sensors placed throughout your property's mechanical room.

#### Email/SMS Notifications

Receive real-time notification for any water issues that may arise.

#### 24/7 Emergency Services

Symmons will contact your property 24/7 for any water system emergency alerts.

#### Health Center (Project Management)

Water diagnostics and plumbing system issue management.

#### Water Anomaly Detection

AI powered water behavior prediction engine catches water issues before they impact your property.
